Great opportunity for Developers and Investors. Vacant 1.44 acre development site offering incredible potential in the growing Westgate neighbourhood. This property is located immediately North of a busy retail shopping area offering great walkability to a large variety of nearby services and amenities. Just North of the location is the new regional hospital and is a short distance to the airport terminal. RM Zoning permits multi-attached dwellings, townhouses, and apartment buildings with a maximum height of 4 storeys. The current conceptual drawings call for a striking 22-unit townhome development. The previously approved project comes with various pre-approved reports, including drawings, plans and renderings, with a conditional development permit.
